

Introducing the

Proteograph[®] Product Suite

featuring the **Proteograph ONE Assay**

The **Proteograph Product Suite**
puts you on the **frontlines of discovery.**

Welcome to a **new dimension** in discovery.

Introducing the **Proteograph® Product Suite**
featuring the **Proteograph ONE Assay**

With the **Proteograph Product Suite**, Seer enables you to uncover the insights that will elevate your advantage in proteomics—**revealing more of the proteome** for you, so you can unveil new discoveries for the world.

Unlock large-scale studies with the Proteograph ONE Assay

- Identify up to **10x more** protein groups than direct digest (neat) methods
- Process up to **80 samples** at a time with only 1 mass spectrometry (MS) injection per sample
- Analyze a **range of sample types** and applications across human and non-human species

Optimize reproducibility and throughput with the SP200 Automation Instrument

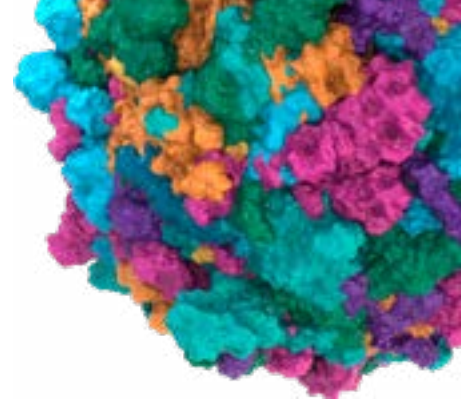

- Analyze over **1,000 samples** per week with one instrument
- Fit full batch processing into an 8-hour shift with **<5-hour runtime**
- Achieve **industry-defining** precision

Utilize mass spectrometry, the gold standard for high-resolution proteomic profiling

- Amplify the power of MS to deliver increased **depth and scalability**
- Enable **breakthroughs** in drug development, disease research, and precision medicine

Accelerate deep biological insights with the Proteograph Analysis Suite

- Streamline analysis with an automated and **intuitive** pipeline
- Access **true scalability** to power cohort-size studies
- Deliver **impactful**, publication-ready visualizations

Introducing the **Proteograph Product Suite** featuring the **Proteograph ONE Assay**

Identify up to

10x

more protein groups than
direct (neat) methods

Analyze

1,000+

samples **per week** with the
Proteograph ONE workflow

Jumpstart your proteomic research

Seer enables unbiased, deep, rapid proteomics at scale through the **Proteograph Product Suite** in multiple ways to meet the budgetary and operational needs of all types of projects.

1

Bring the **Proteograph Product Suite** in-house

2

Conduct a project with
a **Seer® service provider**
or Center of Excellence

3

Run a project with
Seer Technology Access Center
